

Become an official Endorser!

Did you know, there are over 400 neurological disorders, affecting at least 1 in 3 people worldwide? Together, they are the leading cause of disability adjusted life years, and the second leading cause of death.

It's time to make neurology a global public health priority and the OneNeurology Initiative is aiming to do just that...

Our multi-stakeholder, patient-focused initiative aims to unite and strengthen neurology-related groups to stimulate collaborative advocacy, action and accountability for the prevention, treatment and management of neurological disorders worldwide.

We want to demonstrate what makes all neurological disorders ONE and what's in it for the community, and wider society, if they are all addressed together, in parallel to disease specific advocacy activities.

We want you to strengthen our cause by coming on board as an Endorser.

Any organisation, network or entity substantially engaged in neurology advocacy can join the OneNeurology Partnership, either as a Partner or an Endorser.

Partners must be international organisations, but can also be regional neurology groups if multinational and non disease-specific.

Endorsers can be any other group that share the objectives of our Partnership. Endorsers will be listed on the website, will receive regular updates and be invited to join open meetings and workshops.

Note: Endorsement is not open to individuals

For more, visit www.oneneurology.net/partnership or you can [sign up here](#) to formalise your endorsement now!

Let's unite to make neurology a global public health priority and bring hope and solutions to the millions of people worldwide living with a neurological disorder!

The OneNeurology Initiative is co-founded by the European Federation of Neurological Associations and the European Academy of Neurology – see the oneneurology.net website for details of confirmed partners and supporters.
